14. Settings

1. How to download software to your mobile phone.

(1) Locate "App Store" on your mobile phone and click. Search for "MetaTrader 4" in the search bar of the new window.

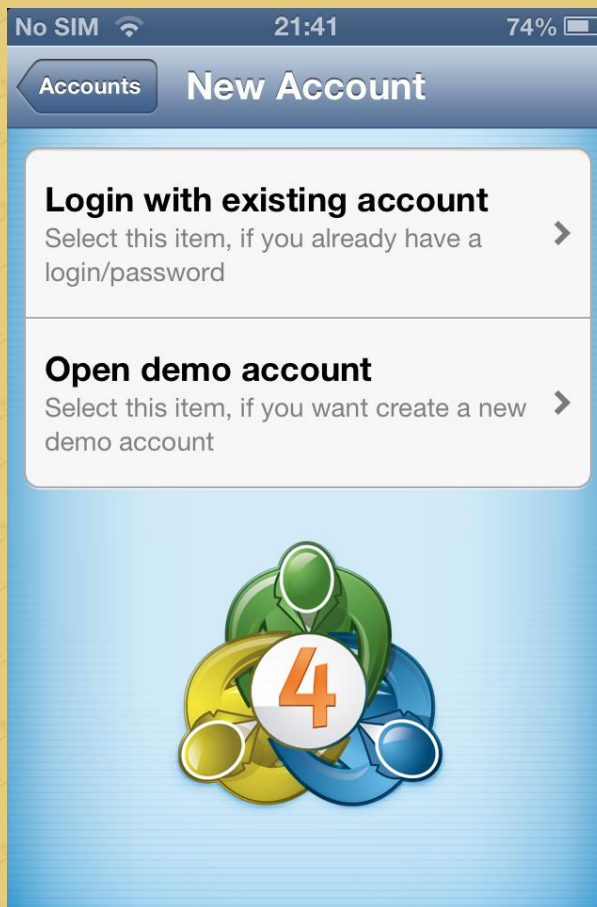

(2) Select "MetaTrader 4" and install. Please enter your password before installing. Once installed, the MT4 icon will appear on your desktop.

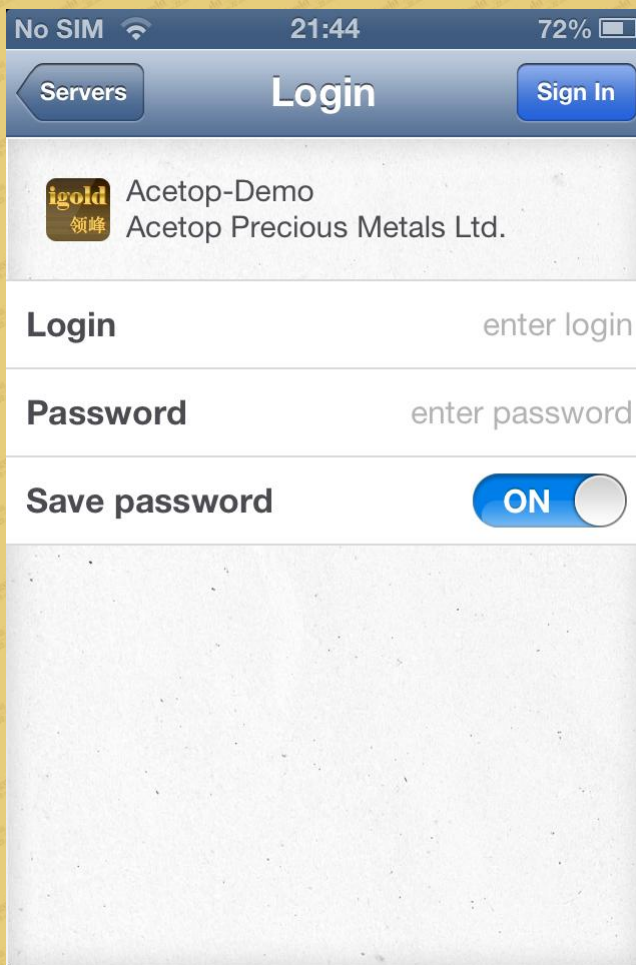

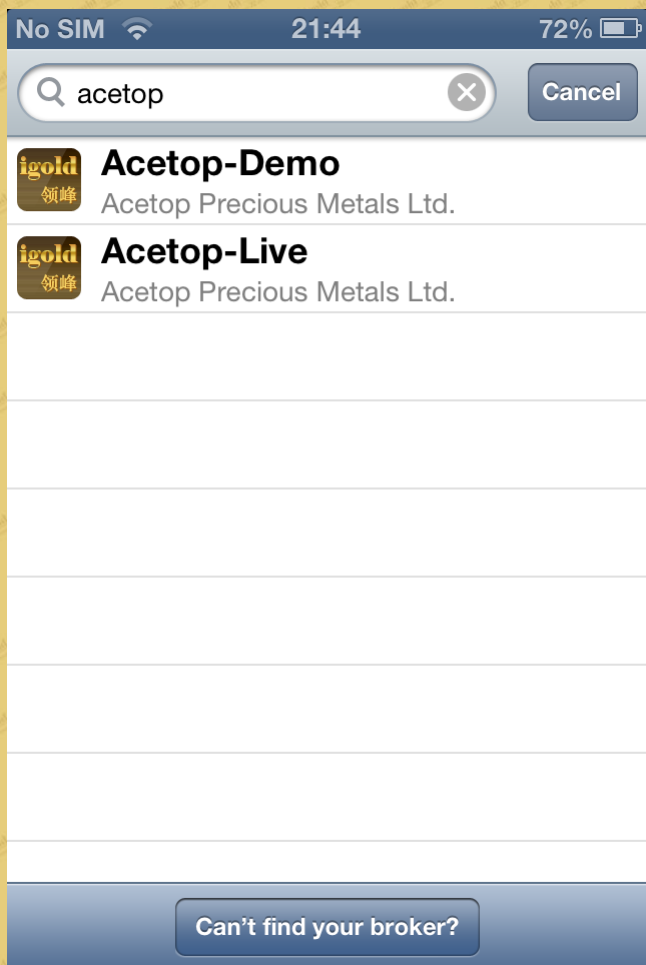

2. How to log into the mobile trading platform.

(1) After installing, click "MetaTrader 4" on the desktop, then click "Login with existing accounts."

(2) When you enter "Acetop" in the server's search bar, you will immediately see the Acetop Precious Metals server listed. Acetop-Demo is the server for the demo account, while Acetop-Live is the server for the real account.

Please select the server according to the account type. For instance, for the demo account, after you select Acetop-Demo, sign in using your trading account number and password. Select "save password" if you want to save your password on your device, then click "Sign in" to log in to your account.

### 3. How to open trade

(1) After you have successfully signed in, you will see a real-time quotes window. There are two types of quotes window: the simple and the advanced. The advanced search displays the time of the last price quote, the spreads, and the day's highest and lowest prices.

GOLD represents London Gold. SILVER represents London Silver.

The "Trade" button pops up when you click on the product you want to trade.

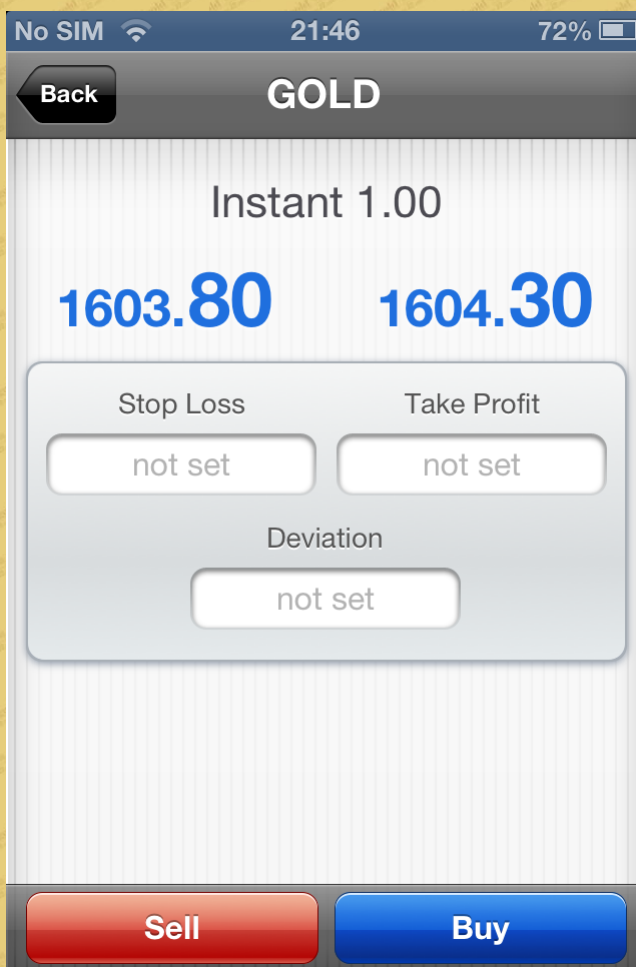

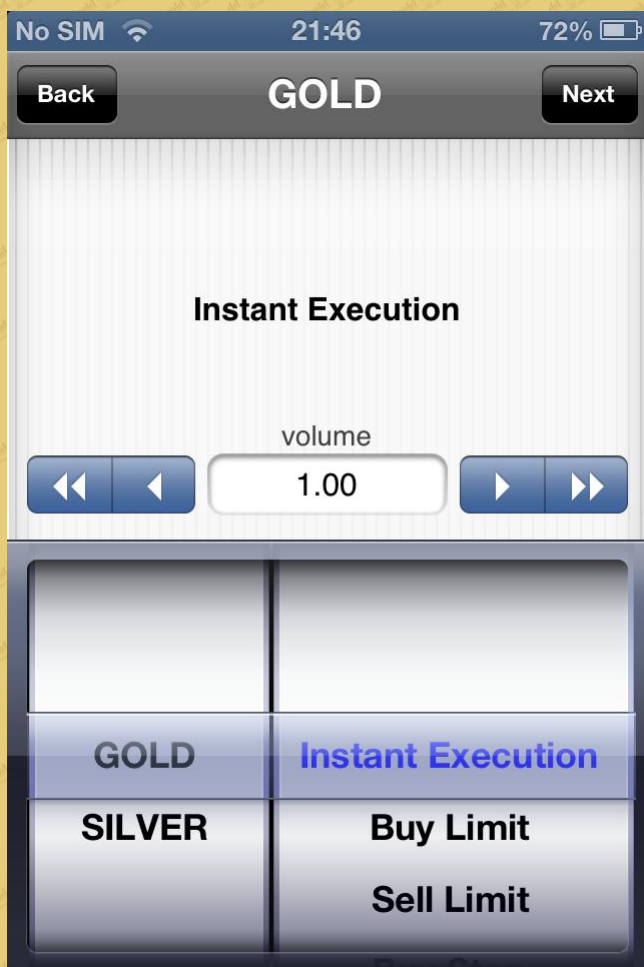

(2) When you click "Trade," the window for trading will appear. For instance, if you want to make a real-time trade now, set up the lot size and the product first, then click "Next" at the upper right-hand corner.

Then set the price levels for the "Stop Loss" and the "Take Profit."

There is another setting called "Deviation." Deviation allows the maximum deviation of the quotes and the transaction price.

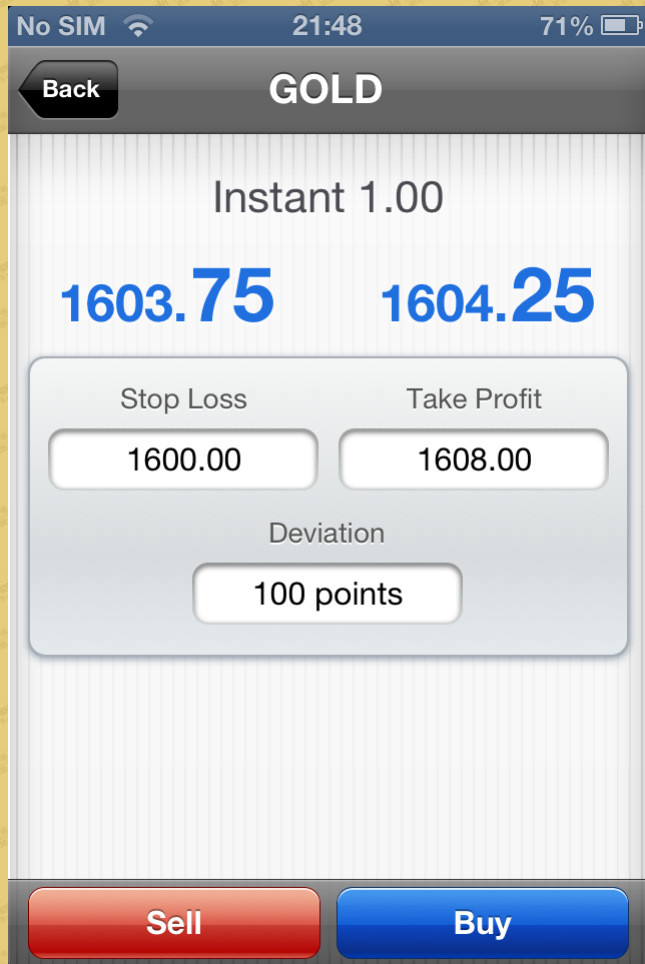

If you click "Sell," it means that you sell when you think the future price will go down. If you click "Buy," it means that you buy when think the future price will go up. There are two buttons on each side of the "Volume" on the left. In a demo account, for instance, the single triangular button is set in one-lot increments. If you click the double triangular button on the left, the minimum trading volume is one lot. If you click the right double triangular button, then you may trade in lots of 2 to 8.

If you log into a real trading account, the single triangular button is set with an increment of 0.05 lots, and the double triangular button is set with an increment of 0.5 lots. The minimum trade size for the real account is 0.05 lots. The maximum is 40 lots.

(3) When you click the blank space in "Stop Loss" or "Take Profit," a keyboard will pop up. You can key in the price set for the "Stop Loss/Take Profit". The "-" or "+" sign allows the increase or decrease of a set increment of US\$0.01.

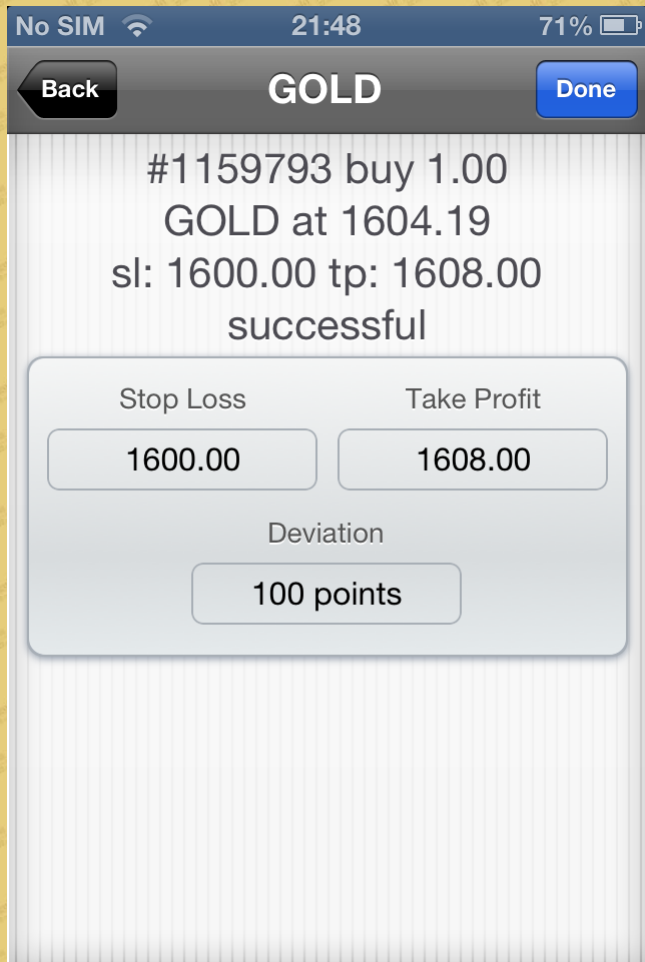

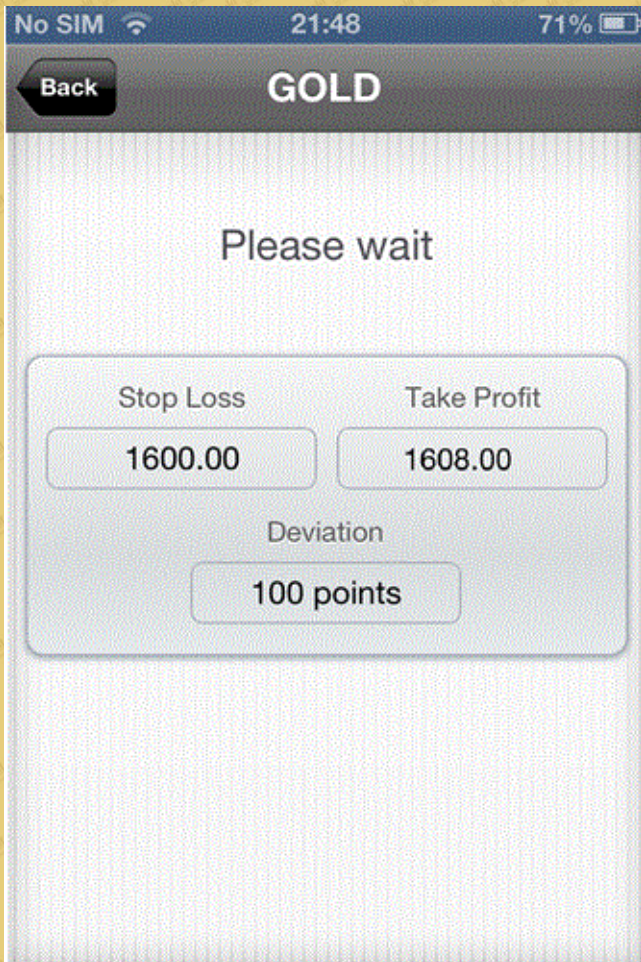

After setting a maximum deviation, click "Sell" or "Buy" to place an order.

(4) When either the "Sell" or "Buy" is clicked, the instructions for placing your order is on its way.

When the trade has been successfully transacted, a window will display the information regarding the price, the lot size, and the settings for the stop loss/take profit. To complete the order, click "Done," at the upper right-hand corner of the screen.

(5) You can check your trade order at the "Trade" window. The two numbers below the trade order represent the price at the time of your trade and the current price.

(2) After confirming the closing price, click the "Close at" at the price where you want to close. Once the step is successfully executed, the window will display the closing price and the lot size. To complete closing the trade click "Done" at the top right of the screen.

5. How to set and modify "Stop Loss/Take Profit."

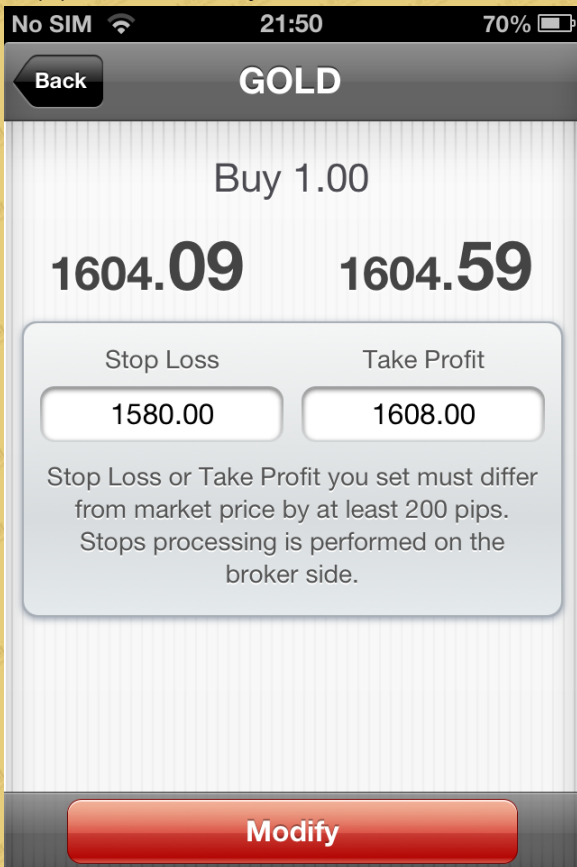

(1) In the "Trade" window, click on the market order. Once opened, press on the market order and hold for a few seconds, a "Preference" window will pop up, click "Modify."

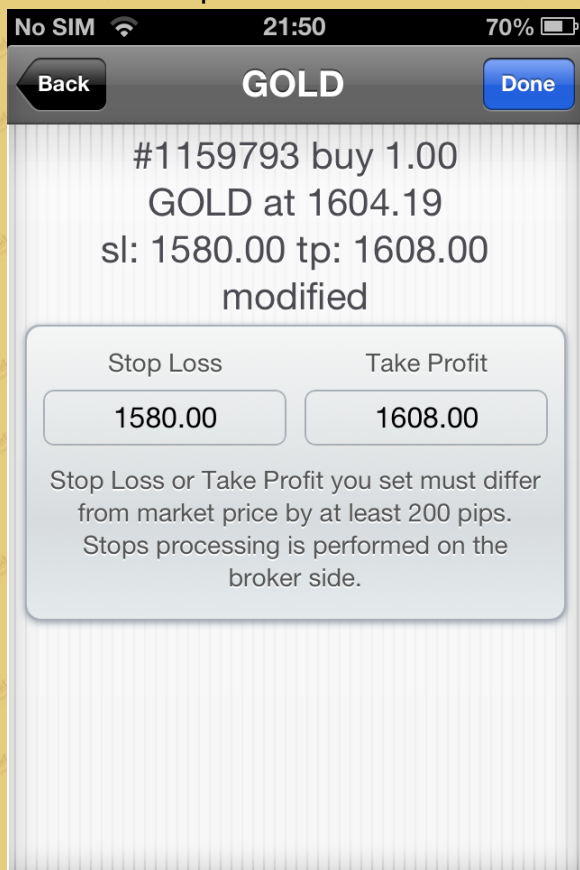

(2) Click the blank space in the "Stop Loss" and "Take Profit" and enter the prices. Click "Done", to complete the setting.

(3) Click "Modify," and wait for the confirmation.

(4) When it is successfully confirmed, click "Done" at the top right of the screen. You can view the new modified price under "Positions" in the "Trade" window.

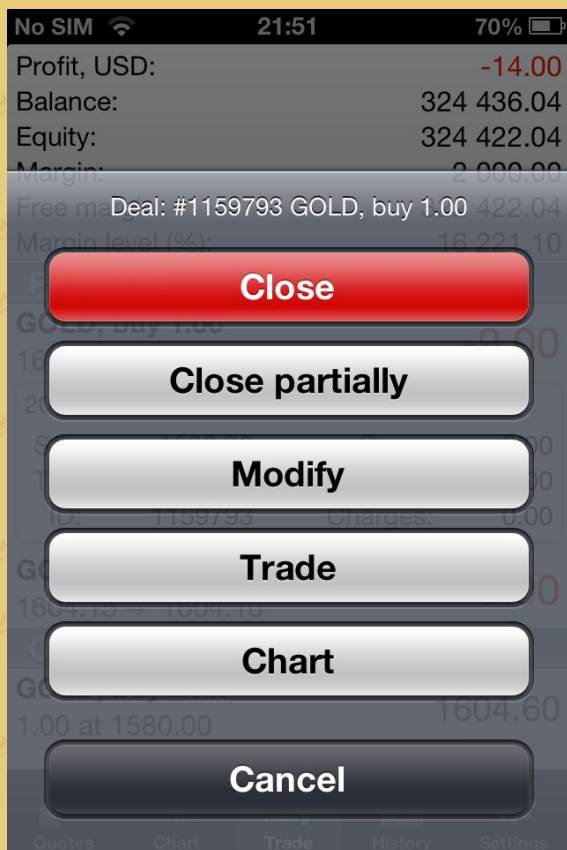

You can also view your modified order from the "Trade" menu.

If the price is not set correctly or the amount is mistakenly reversed, a prompt, "Invalid S/L or T/P," will appear in the window. It means that the price of the "Stop Loss" or the "Take Profit" is invalid.

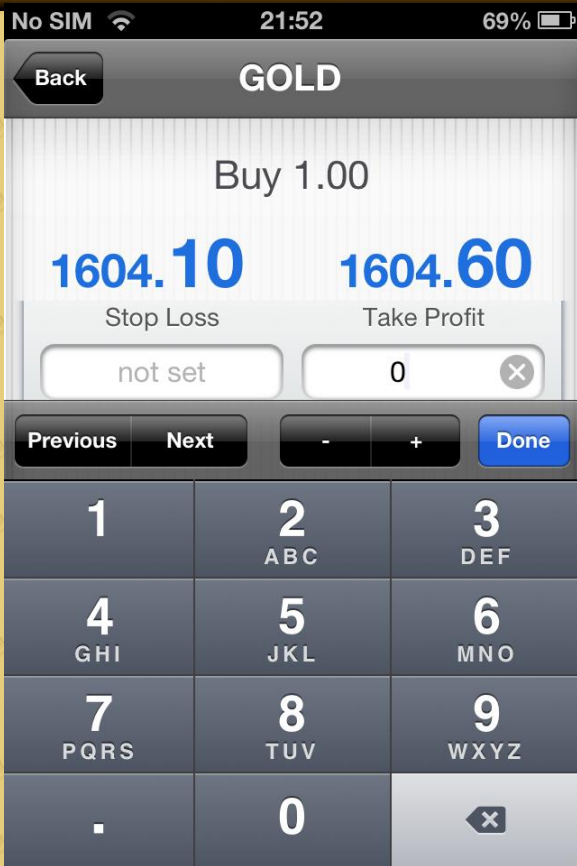

### 6. How to delete Stop Loss/Take Profit.

(1) In the "Trade" window, click open the market order, press down on the order and hold for a few seconds, then click "Modify" when the preferences window pops up.

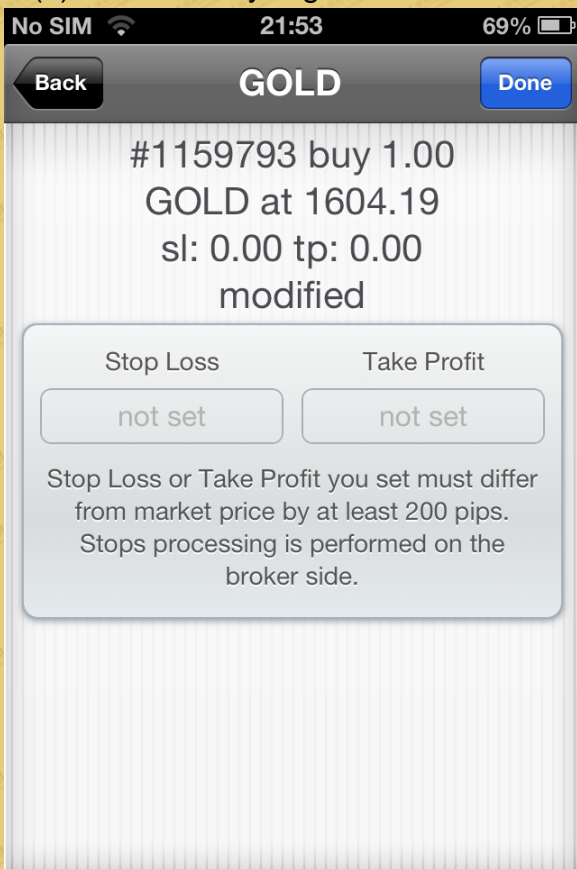

(2) Click the blank space in both the "Stop Loss" and "Take Profit," enter a price of "0," then click "Done."

(3) Click "Modify" again and wait for the confirmation.

(4) When the last step has been successfully completed, you can view your new modified prices of the "Stop Loss/Take Profit" under "Positions" in the "Trade" window.

## 7. How to set Pending Order

(1) In the "Quotes" window, click the product for which you want to place a pending order. When the preferences window pops up, click "Trade."

(2) Enter the lot size of the pending order. Under the preferences window, select the product and the type of pending order. Click "Next" at the upper right-hand corner.

(3) Enter the amount in the "Price." You can also set the price under the category of "Stop Loss/Take Profit", or set an expiration date for the "Stop Loss/Take Profit" in the "Expiration." Click "Done." The default expiration date for a pending order is one trading week. Please note that for a pending order, you cannot set the expiration date to exceed one trading week.

(4) Once the price is set for the pending order for "Stop Loss/Take Profit," click "Place."

## 9. How to delete pending order

(1) To delete, use the same steps as above: under the "Orders" in the "Trade" window, click the pending order that you want to delete. Once the details is studied, click the pending order that you want to delete, the preferences window will pop up, click "Delete."

(2) When the confirmation dialog box pops up, click "Delete" again. Once it is deleted, the record for that pending order will no longer exist under the "Orders" in the "Trade" window.

## 10. Chart

When you click the "Chart" button below, the charts page opens.

Appearing at the top are the chart cycles: M1: 1 minute; M5: 5 minutes; M15: 15 minutes; M30: 30 minutes; H1: 1 hour; H4: 4 hours; D1: one day. You can click to switch the chart cycle. If you want to switch to the charts of other products, go back to the quotes window, click the product, **when it opens, click "Chart."**

There are three ways to display a chart: as a bar chart, a candlestick chart, or a line chart. The three buttons at the top correspond to the three different displays.

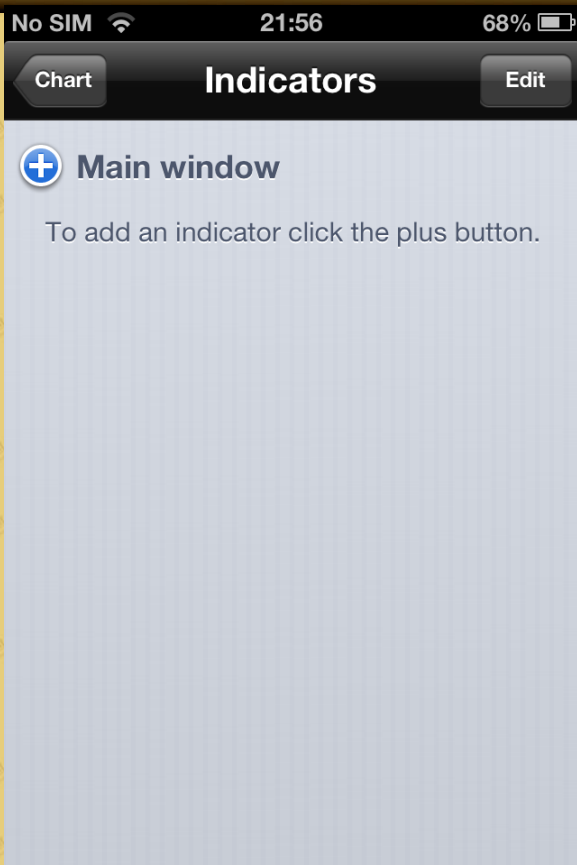

The cross button on the right is the location cursor. Click on the cursor and then click on a location in the chart, the price and the time of that location will display on the screen. To cancel the selection by the cursor, click the location cursor again.

The "f" button on the right of the location cursor represents adding or deleting of an indicator.

## 10.1 Add Indicators

(1) After you click the "f" button, click "+" in the "Main Window" for a list of indicators.

(2) Select the indicator you want to add.

(3) After you set the parameters, click "Done" after confirming the setting. You now can view the newly added indicator on the chart.

The newly added indicator,

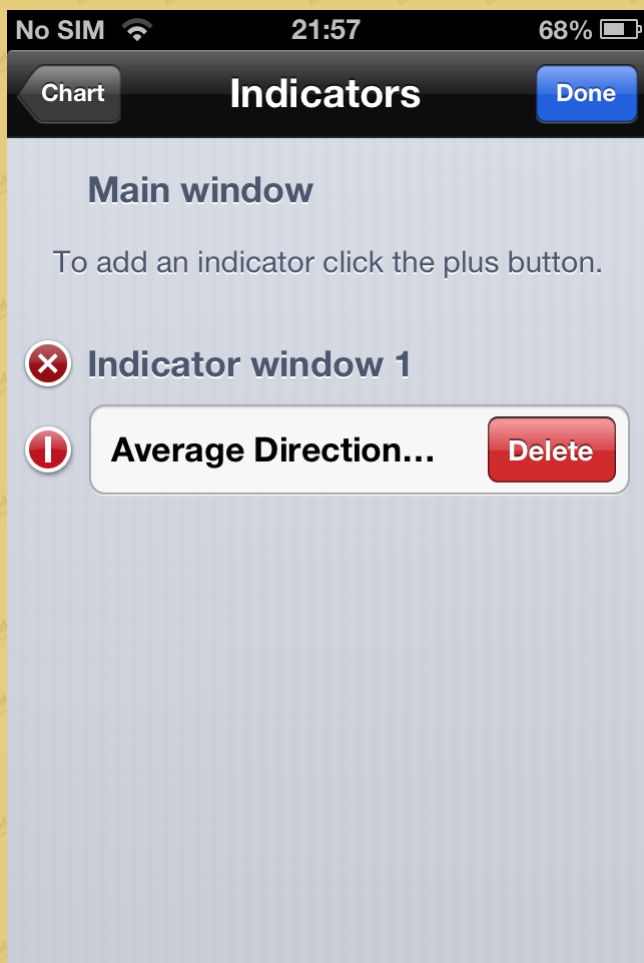

## 10.2 Delete indicators

(1) To delete the indicator, click on the chart. In the pop-up window, select "Indicators."

(2) To delete an indicator, press "Edit" at the upper right-hand corner. In the new window, click the red "-" sign on the left of the indicator name, then "Delete" and "Done," in that order.

## 11. Quotes

The Quotes window displays the recent quotes for GOLD and SILVER.

The Quotes window is categorized further into "Simple" and "Advanced." The "Advanced" window displays the time of the very last quote, the spread, and the day's highest and lowest prices.

On the left of the "Quotes" button is the "Edit" button. You can delete the product by first clicking "Edit." After the product to be deleted is selected, press the red "trash bin" icon at the upper right-hand corner, then press "Done." Please note that GOLD is a product that must be retained.

You can add a variety of trades by clicking the "+" button on the right of the "Quotes." At the present time, we only offer GOLD and SILVER.

If you mistakenly delete the correct product, click the "+" button, select the product you want to add, click the green "+" button. When finished, click "Done."

## 14. Settings

The "Accounts" window displays the current traffic, the current server being used, and the point that connected to the server.

You can also add the server of your real or demo account to the "Accounts" window by clicking "Accounts," then click the "+" button located at the upper right-hand corner of the screen.

You can set up a chart in the "Chart" window. "Volumes" refers to trading volumes. If you select "Trade Levels," you will see the pending order prices for SL and TP display on the chart. The acronym of OHLC stands for opening price, highest price, lowest price, and closing price. The "Date Window" refers to the window that displays the trade figures.

The "Journal" window displays the record of the day's trading operations. If you want to see the operations of the past, click on the left-pointing arrow below and select the record of the date you have set.
